	Sex: Male Date of birth: April 1, 1994 Place of Birth: Mukamira, Nyabihu, Western Province, Rwanda Nationality: Rwanda

II. Summary

Evariste Manirumva is an economist with expertise in macroeconomic modeling, data science, and evidence-based policymaking. He holds a Master's degree in Applied Quantitative Economics from the University of Rwanda in partnership with the Kiel Institute for the World Economy and completed the Data Science Fellowship Program at the African Institute of Mathematical Sciences (AIMS), where he gained advanced skills in Python programming, data analytics, SQL database development, machine learning, and AI modeling. Currently serving as an Economist at Rwanda's Ministry of Finance and Economic Planning (MINECOFIN), Evariste contributes to the development of key analytical tools such as the Quarterly Projection Model (QPM), the Computable General Equilibrium (CGE) Model, and a Social Accounting Matrix (SAM) framework for climate and capital account integration within the World Bank's MANAGE model. His research interests focus on macroeconomic and macroclimate modeling, environmental management, and sustainable development.

II. Biography (Academic and Professional Summary)

Evariste Manirumva is an economist dedicated to advancing evidence-based policymaking through quantitative research and data-driven analysis. He integrates economic theory, applied quantitative methods, and modern data science to address real-world development challenges.

He holds a Master's in Applied Quantitative Economics from the University of Rwanda (UR) in partnership with the Kiel Institute for the World Economy (IfW Kiel) under the cooperation of the German Federal Ministry (KfW). The program provided him with strong foundations in econometrics, mathematical modeling, and empirical policy analysis.

Evariste further developed technical expertise through the Data Science Fellowship Program at the African Institute of Mathematical Sciences (AIMS), gaining skills in data management, Python programming, PostgreSQL (SQL), API development, machine learning, Large Language Models (LLMs), and Deep Learning.

He has contributed to research and policy institutions including icipe, GIZ, and the Economic Policy Research Network of Rwanda, including authoring a paper on the impact of push-pull technology on smallholder farmers under the UPSCALE Project.

Currently, Evariste serves as an Economist at Rwanda's Ministry of Finance and Economic Planning (MINECOFIN), focusing on macroeconomic modeling and forecasting. He has helped develop the Quarterly Projection Model (QPM), Computable General Equilibrium (CGE) Model, near-term nowcasting tool, and a Social Accounting Matrix (SAM) framework for climate and capital account integration within the World Bank's MANAGE CGE model, enhancing Rwanda's capacity for climate-informed policy planning.

III. Work Experience

Dates	Position/organization
April 2023 – To date	Economist & Modelling Specialist at Ministry of Finance and Economic Planning (MINECOFIN), Department of Office of Chief Economist and Macroeconomic Directorate. Roles: - Macro-modelling toolboxes for quarterly projections and macro-economic analysis -Economic nowcasting using Eviews (Eviews programming, ARDL, VAR, Machine Learning) -Automation of tasks by developing toolboxes and frameworks for macroeconomic analysis -Develop research working paper, guide, and documentation for the Quarterly Projection Model and Computable Equilibrium Model -Provide economic projections and macroeconomic policy analysis; -Produce policy economic briefs on trade, inflation, and economic activities; -Data management and dissemination using GitHub and Dropbox, Python, and dashboards
April 2022 – May 2023	Research Fellow at MINECOFIN in collaboration with GIZ/Macroeconomic and Investment Policies (GIZ-MIP) Program to support macroeconomic analysis using modeling tools. Roles: -<i>Contributing to the development of modeling tools incl. Quarterly Projection Model (QPM) and Computable General Equilibrium (CGE);</i> - <i>Updating the SAM 2017 dataset to 2018-19 for effective use in OCE's CGE¹ and QPM2model;</i> - <i>Contributing to the further improving specification and policy scenarios of the CGE model using GAMS;</i> - <i>Using the SAM/CGE model and other tools for analysis of economic policies and external shocks (such</i>

² Quarterly Equilibrium Model, QPM

	<i>as COVID-19-related) and assessing their impact on socioeconomic groups;</i> <i>- Drafting documentation of the SAM/CGE activities and report on model results & policy recommendations;</i> <i>- Use other model tools and participate in research and modeling activities under MPD's research agenda;</i> <i>- Assist in producing monthly or quarterly inflation, trade, and inflation Brief.</i>
March-November 2022	Consultant for Friday breakfast program at Friedrich-Ebert-Stiftung (FES) <i>-Revision of action plans</i> <i>-Reviewing and developing program proposals and concept notes -Preparation and organization of policy dialogues and Friday Breakfast</i> <i>-Evaluation of monthly sessions and report</i>
December 2020 – July 2021	Young Economist/ Young Economist Program³ (YEP) in Ministry of Finance and Economic Planning (MINECOFIN) under collaboration with GIZ/Macroeconomic and Investment Policies (MIP)
June 2021 – June 2022	Research Fellow for UPSCALE project Under Programme Dissertation Research Internship (DRIP) of the International Centre for Insect and Physiology and Ecology, (ICIPE), Kenya <i>Roles:</i> <i>- Data cleaning, analysis, and reporting on the socio-economic Baseline Survey for the UPSCALE project</i> <i>-Conduct a research project about analysis/evaluation of the socioeconomic impact of Push-Pull Technology adoption in Rwanda</i> <i>-Produce a thesis and a published manuscript paper</i>
Jan 2019 – Dec 2021	Partnership Management and Research Intern at Economic Policy Research Network (EPRN), Rwanda <i>-Develop concept notes for research programs</i> <i>-Develop/update training manuals</i> <i>-Identify consultancy opportunities and prepare documents for application</i> <i>-Assist in developing project and grant proposals</i> <i>-Revision and developing tools for data collection</i> <i>-Assist in revising research papers</i>

³ Young Economist program, YEP is a learning-working platform that provides a practical environment and capacity building to interns on work underlying courses. The program is hosted by MINECOFIN and financially supported by the German cooperation development agency, GIZ.

Nov - 2019	Professional Trainer/ ERP- Statistics Lab Consultant to provide a workshop on the use of R & Python <i>Facilitated a monthly workshop for 10 staff and clients on the application of new statistical tools 'R & Python software' in data entry, data cleaning, and descriptive analysis.</i>
------------	--

IV. Education

University	Degree awarded & Program duration
University of Rwanda (UR) under Kiel Institute of World Economy, Kiel, German	Master of Science in Applied Quantitative Economics, ⁴ (MSc AQE) -- Attended <i>from 2019 to 2023</i>
University of Rwanda (UR)	Bachelor of Science (BSc) in Economics (Hons)--- Attended <i>from 2014 to 2018</i>

V. Training/Professional Fellowship

Issuing institution	Subject/Course
African Institute of Mathematical Science (AIMS)	Data Science Fellowship Program: -Data management and analytics -Coding and programing in Python -Database development using Postgres (SQL) -Development of APIs -Machine Learning, Large Language Models and Deep Learning -Development of Artificial Intelligence (AI) Models
Joint Vienna Institute (JVI) Vienna Austria	Designing & Implementing Debt Management Strategies

⁴ The Master's degree is yet to be awarded at the November 2023 graduation ceremony

Center for Policy Studies (CPS), Victoria University, Australia	Practical General Equilibrium Modelling
IMF African Training Institute (ATI)	Fiscal Policy Analysis
International Monetary Fund (IMF)	Revenue Forecasting and Analysis
International Monetary Fund (IMF)	Projecting Public Debt-Debt Dynamic Tool (DDT)
UNU-WIDER	Tax-Benefit microsimulation model for Rwanda
International Food Policy and Research Institute, (IFPRI)	Advanced Macroeconomic Modeling: CGE Models
International Monetary Fund (IMF)	Financial Programming Policies, (FPP) I & II
International Monetary Fund (IMF)	Macro-econometric forecasting and macroeconomic diagnostics
African Institute for Economic Development and Planning	Macroeconomics modeling for sustainable development
World Bank Group	Impact Evaluation Methods with Applications in Low- and Middle-Income Countries.
Economic Policy Research Network (EPRN)	-Poverty Analysis using STATA -Time series analysis using e-Views -Application of R and Python in Economic data analysis. -Advanced data analysis using SPSS -Planning, Monitoring and Evaluation and Reporting of Projects

VI. Conference presentations and submission& prospective publications

Subjects/Topics	Journal/Conferences
The Impact of Push-Pull Technology Adoption on Food Security among Smallholder Cereal Growers	Journal of the Science of Food and Agriculture

The Impact of Push-Pull Technology Adoption on Food Security among Smallholder Cereal Growers	Global Development Conference 2024, Biodiversity and Development in Quito, Ecuador
Jobs, Climate, Growth: Macroeconomic Modelling for a Resilient Future	2024 Regional Conference of NEDA Sector Network, Socio-economic Development in Africa - Creating and Sustaining Decent Work in a more complex world in Acra, Ghana
